Report of Swachhta Hi Sewa 01st October 2023

The Swachhata programme for 01 October 2023 was carried out at Symbiosis Institute of Geoinformatics, Pune. Faculty, students, and staff came together for a special one-hour 'Shramdaan' on the outskirts of the campus, adhering to Swachhta-hi-seva guidelines. The College and surrounding premises of the campus were cleaned and residents were made aware of the cleanliness drive. The staff members and students participated in the programme with great enthusiasm. Plastic materials were collected from nearby surrounding and shops. The students also spoke to the residents and shopkeepers to create awareness against usage of plastics. The collected plastic materials were disposed safely with the help of city corporation on the next day. This initiative goes beyond cleaning; it's about raising awareness. We're committed to creating a plastic and debris-free environment starting from 1st October 2023. With an inspection mechanism in place, we covered approximately 3500 sq. mt. area. Over 110 students, faculty, and staff joined in.
